What you need How you need it

You have a need for standard reporting, like anyone else. Without those reports you would drop a business management software package from consideration. But there are some other reporting needs you have, too: something specific to your niche or your management style, and something no one seems to have. **Spruce has you covered.** And because we don't consolidate data, you can get all the detail you need long after the day it was created.

“Basic” Reporting with powerful options

SpruceWare.NET's standard reporting includes the reports everyone needs and options that make them both flexible and powerful.

- Narrow your report to a date or range, transaction type, user ID, etc.
- Further filter results based on transaction status, stock status, etc.
- Sort results as you want
- Choose how to subtotal results
- Pick specific branch locations
- Choose whether to print results, view them on screen, or save them to a file (PDF, Excel, etc.)
- Schedule reports to run as often as you like to your reports folder
- Drill down to specific documents when viewing reports on screen
- Concrete document paper trail on one screen

World-class tools for custom & advanced reporting

Take advantage of Crystal Reports or the Dashboard Administrator's license to create exactly what you're looking for from the Spruce system; they are included with every system. Use Crystal to create reports with drill-down functionality, graphs and charts, and color-coded highlights and alerts.

- Access multiple data sources, including all the detailed SQL tables created by SpruceWare.NET.
- Use the SpruceWare.NET dashboard to create or use up-to-the-minute charts and graphs, highlighting performance information so you can make your business more profitable.
- No time? Spruce will write reports just the way you want them for a nominal fee.

Free templates any time

Enter the customer area of our web site, www.sprucecomputer.com, to look through custom reports others have requested. If you see one you like, you are free to use it as is or customize it to suit your own needs.
